

SUPPLEMENTAL MATERIAL

Supplementary Data I: Changes in systolic BP (A) and diastolic BP (B) at screening visit, enrollment/baseline (month 0) and at months 1 and 3.

Supplementary Data II: Systolic Blood Pressure control during follow-up among subjects with SBP>140mmHg and/or DBP>90 at baseline visit. Eligibility for trial enrollment was determined at screening/enrollment visit. At enrollment all subjects were on antihypertensive therapy, with 17 subjects in PINGS and 18 in SC arms not on target at enrollment visit.

Supplementary Data III: Systolic Blood Pressure control during follow-up among subjects with SBP<140mmHg and/or DBP<90 at baseline visit. Eligibility for trial enrollment was determined at screening/enrollment visit. At enrollment all subjects were on antihypertensive therapy, with 13 subjects in PINGS and 12 in SC arms not on target at enrollment visit.
